Accessibility Statement

IN ACCORDANCE WITH AGID GUIDELINES AND D.LGS. 106/2018 (DIRECTIVE UE 2016/2102)

EVOLUTION SRL is committed to making its website accessible, in accordance with Legislative Decree 10 August 2018, n. 106, which transposed Directive (EU) 2016/2102 of the European Parliament and of the Council. This accessibility statement applies to the website: **https://evolutionsrl.org/en**.

1. Compliance Status

This website is **partially compliant** with the requirements of the AGID (Agenzia per l'Italia Digitale) guidelines and WCAG 2.1 at AA level, due to the specific non-compliances identified through automated analysis and Lighthouse audits.

2. Non-Accessible Content

Following technical compliance testing, the software elements and content listed below are non-accessible for the following digital accessibility reasons:

- **Insufficient color contrast:** Certain text or user interface elements exhibit a contrast ratio against their background below the minimum required thresholds (4.5:1 for normal text), making it difficult for users with low vision to read (WCAG Success Criterion 1.4.3).
- **Missing accessible names or labels:** Some interactive elements (buttons, links, or form controls) lack clear alternative text labels, or their `aria-*` attributes are not optimally configured for screen readers (WCAG Success Criteria 1.1.1 and 4.1.2).
- **Structural heading hierarchy:** On some pages, the order of headings (from `<h1>` to `<h6>`) does not follow a correct, logical, and sequentially descending order, which affects navigation for assistive devices (WCAG Success Criterion 1.3.1).
- **Language attributes:** In specific localized contexts, language tags might be missing or not precisely specified to indicate variations or the exact current language of the webpage (WCAG Success Criterion 3.1.1).

3. Preparation of this Accessibility Statement

This statement was prepared on **June 29, 2026**.

The evaluation was carried out via a **technical self-assessment** supported by the use of automated scanning and analysis tools (Lighthouse / Google PageSpeed Insights) integrated with AGID accessibility evaluation checklists.
